

SEPTEMBER 2007

PMP Limited is committed to providing a safe and healthy working environment for employees, contractors and visitors throughout its businesses.

At PMP we regard all work injuries as potentially preventable and recognise that a safe and healthy work environment is fundamental to the efficiency and success of our business operations.

Excellence in OHS performance will only be achieved by management and employees communicating openly and actively working together to create a safe workplace through safe systems of work.

To achieve these objectives PMP will:

- continuously improve its OHS performance;
- comply with all applicable OHS Laws, Regulations, Standards and Codes of Practice;
- hold PMP management accountable for performance against measurable OHS targets and goals;
- identify, analyse and manage health and safety risks in a consistent manner;
- involve employees and contractors through the use of regular 'walk-round' Management Inspections, Tool Box meetings, OHS Committee meetings and other appropriate consultative mechanisms;
- train and hold individual employees accountable for health and safety in their area of responsibility;
- monitor, review and report health and safety performance in an honest and forthright manner;
- undertake regular management reviews and audits of the appropriateness and effectiveness of PMP Standards and Safe Work Procedures; and
- benchmark, promote and communicate our health and safety commitment to our clients and the community.

We expect everyone in the company to place their safety, and that of their colleagues, above any other business priority.

BRIAN EVANS
Chief Executive
